

# Workshop session - What do users need?

## ▶ Aim

- ▶ Provide an opportunity to feed back on the objectives of the event, reflecting on the 'scene setting' and 'practitioner experience' discussed so far
- ▶ Discuss Q1, Q2 or Q3
- ▶ Move onto other questions if time
- ▶ Record points on sheets
- ▶ Identify and feed back top 3 points

# Workshop session - What do users need?

## Q1. What stops you/your organisation using economic valuation more often / widely?

- i. Why and when do or should we do valuation?
- ii. How do/should we communicate process/results?
- iii. Do we have the right/sufficient methods, tools?
- iv. What other (non-valuation based) evidence do we need?
- v. Do we need more consistency in approaches or use/reporting of values?

## Q2. What needs to happen for you/your organisation to trust economic values more?

- i. Who is or needs to undertake/use valuation?
- ii. Who needs to be involved in the process?
- iii. Do we need some (independent or regulatory) oversight, approval or certification?
- iv. Are some approaches/values more 'acceptable' (e.g. revealed preference)?
- v. How should we deal with /communicate uncertainty?

## Q3. Where are the evidence gaps?

- i. In the underlying science?
- ii. In the values themselves (which ones)?
- iii. In application of the values (e.g. transfer functions)?
- iv. Do we tend to 'fall back on' certain valuation evidence/sources?
- v. How do we make evidence more accessible?
